

driplate[®] is the market leading solution
for catching water drips from hand dryers before reaching the floor

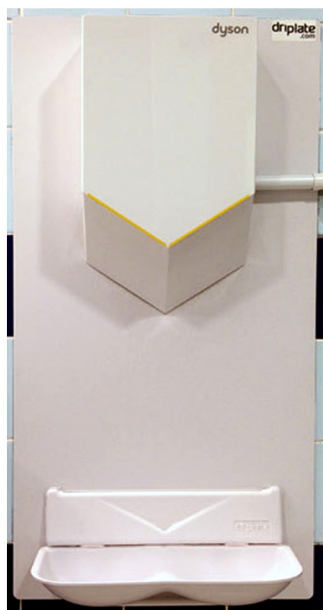

driplate[®] has been developed to solve the issue of dripping hand dryers. All hand dryers cause water droplets to end up on the floor, but this can be eliminated with a simple retrofit of the **driplate**[®] drip-tray.

- Fits perfectly underneath **Dyson Airblade mk1, mk2 & dB** hand dryers (AB01, AB02, AB03, AB04, AB05, AB06, AB07 & AB14).
- Also suits **Dyson Airblade V**, Xlerator, Lovair AirFury, Warner Howard Airforce and all other leading jet hand dryers.
- Tastefully crafted to reflect the **sleek design** of the Dyson Airblade hand dryer.
- Manufactured from **impact-resistant ABS Polycarbonate** plastic.
- Matching **Dyson RAL White and Steel Grey** colours.
- **Silver-Ion impregnation** to reduce bacterial growth on the tray surface.
- Screws hidden by the simple, click-in-click-out, easy-empty tray.

Its ease of use, robustness, functionality and modern design are what make **driplate**[®] the world's market-leading hand dryer drip-tray.
