

ADVANCED WASTE DISPOSAL SYSTEMS

Steel Recycling Station Series

For Superior Waste Stream Management

T 3 X330

3 x 20 Gal. Recycling Station

Elegant & Durable Recycling Station with Maximum Efficiency!

Janibell® TX-Series provides un-matched efficiency in liner replacement time and resource management. And its efficiency shines even more with recycling station because ordinary recycling station normally takes 3 times the labor to empty liners,

Key Features

- **ELEGANT DESIGN**

Janibell's design is based in its function. It's simple and cleandesign fits even the most elegant interiors such as museums & all type A buildings.

- **EFFICIENT SYSTEM**

Janibell completely eliminates bag wastes by allowing users to create a custom size bags per needs. Also, this reduces the time to empty out and replace bag over 50%.

- **DURABLE STRUCTURE**

TX series are made with durable premium steel. Then they are liquid painted 3 times and baked 2 times including protective clear coat. It's surface is not only elegant but also very durable much like that of automobile.

- **ECO-FRIENDLY SOLUTION**

Janibell's Zero-Waste bag system sends less plastic material to landfill. Also, Janibell liners are made with 20% recycled material and biodegradable.

Specifications

Dimension: 12.68" (d) x 42.05" (l) x 34.2" (h) / 322 (d) x 1,068 (l) x 869 (h) mm
Weight: 78 Lbs. / 35.4 Kg. Capacity: 3 x 20 Gal. / 3 x 75.7 Litr.
