Thank you for choosing the Twin flow hand dryer.

The hand dryer has a legally-established manufacturer's warranty, which is valid for two years from the date of sale of the product.

Good maintenance is a must for a well-functioning hand dryer. We recommend to clean the machine thoroughly. Daily maintenance is also very important.

Action plan.

1. Clean the four sensors.
2. Clean & flush the water drain weekly.
3. Empty and clean the water tank (on the underside of the Twin Flow). (Click system)
4. Replace 1 to 2 times a year the HEPA filter (Click system + screws)
5. Clean the complete surface of the machine.

Proper maintenance of the machine keeps the dryer in good working order. And ensures indirectly a longer service life.
