

UNIVERSAL ARM LEVER DISPENSER

The multi-purpose solution for the hygienic sector

PRACTICAL & ECONOMICAL

The UNIVERSAL ARM LEVER DISPENSER is particularly well-suited for the hygienic requirements of the most diverse sectors.

- capacity of 500 and 1.000 ml
- suitable for all conventional bottle sizes
- flexible dosage quantities
- easy installation
- detachable drip tray

EQUIPPING AS DESIRED

As far as the UNIVERSAL ARM LEVER DISPENSER is concerned the name says it all: whether for bottles with a capacity of 500 or 1.000 ml it can be utilized in an universal way for all conventional models.

OPTIMIZED HANDLING

The dispenser can be adapted individually to your specific requirements and your hygienical environment. Wall panel and drip tray are detachable, the pump head can be opened smoothly. This way you change the pump in a very convenient way without taking the dispenser off the wall.

Talking of easy: closure plate and key guarantee an easy installation. And thanks to three different stroke adjustments you can define the required dosage quantities flexibly.

FLEXIBLE OPTIONS

Dispenser with wall plate, easy installation

Open the upper cover to remove the pump or to adjust the dosage quantity.

Lockable with closure plate

Inserting the 1.000 ml bottle

Inserting the adapter

Inserting the 500 ml bottle

Detachable drip tray

Ready to operate

SUITABLE FOR EVERY ENVIRONMENT

Whether in hospitals, doctors' practices, kitchens or nurses' stations: Easy installation, wide variety of application and premium product quality makes the UNIVERSAL ARM LEVER dispenser a multi-purpose solution everywhere, where disinfectants are required.
